Your literacy
and information
capital!

"Capitalize on learning @ your
library!"

Meet the Staff

Pamela Williams ~ Information Technology Specialist

I am proud to be a Richland One graduate! I have a BS degree in Elementary Education from Winston-Salem State University and a MLIS degree in Library and Information Science from USC. I hold dual certification in elementary education and school library media. I have 10 years of classroom and media center experience. My favorite past times are reading and spending time with my husband and son. I am looking forward to working with the students and staff at CHS and assisting you with your information needs!

Patsy Dolder ~ Technology Education Specialist

I graduated from USC with a degree in Business Education. I have several years experience working in the business world and in software training. I am delighted to be at Columbia High as your full-time technology educator. I look forward to working with each of you during this school year. Please don't hesitate to call on me.

Zipporah Bunch ~ Media Center Assistant

Getting the Most From Your Media Center

- Understand that you are partners with your Information Technology Specialist (ITS) and Technology Education Specialist (TES) and that you are working together to provide the best possible library experience for your students.
- Time provided at school to read is time well spent. Make sure you are familiar with the South Carolina book award program for high school students. Encourage your students to participate and read daily!
- Read all **memos** and **newsletters** that come from your media center. They contain valuable news and notes you and your students can use.
- Make sure that you know how to use the catalog system so that you can work effectively with your students and also find what resources you might need.
- When you schedule classes to work in the media center, expect to be a **full** participant in the activity, even if the media specialist is doing the instructing. When your students need help doing research, alert your ITS or ETS in advance so that he/she can help.

Your Media Center is the information heart of your school. Take advantage of the resources and materials it has to offer. Your media specialist is there to assist you so that you and your students reap the benefits of being effective users of ideas and information.
